About Us

2007

Akerko Su Ürünleri was founded in 2007 with cooperation of three partners two of them are the best fleet owner of Turkey named Akgün Balıkçılık, Ergün Balıkçılık and Kobyalar Group is producer of the best high quality fish meal and fish oil company.

Akerko Su Ürünleri had in the beginning two production units for frozen anchovy, one of the production unit is the plant located in Trabzon and the other is the vessel with freezers and frozen storage unit for freezing and packaging.

2017

In 2017 we started with the project processing of rainbow trout and had many investigation how to process fillets with the best technologies. That's why Akerko invested in 2018 in the whole processing line of Baader for producing of trout with the best price quality ratio.

Our goal is to process, freez and store in a short time to hold the fish in good condition.

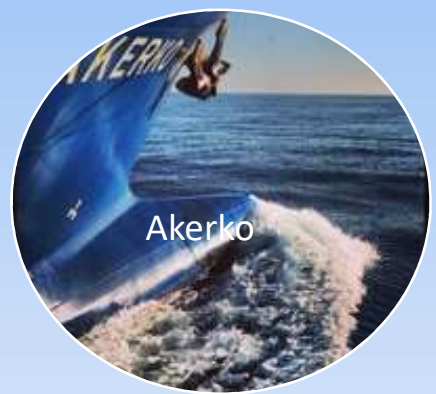

Mission & Vision

Mission

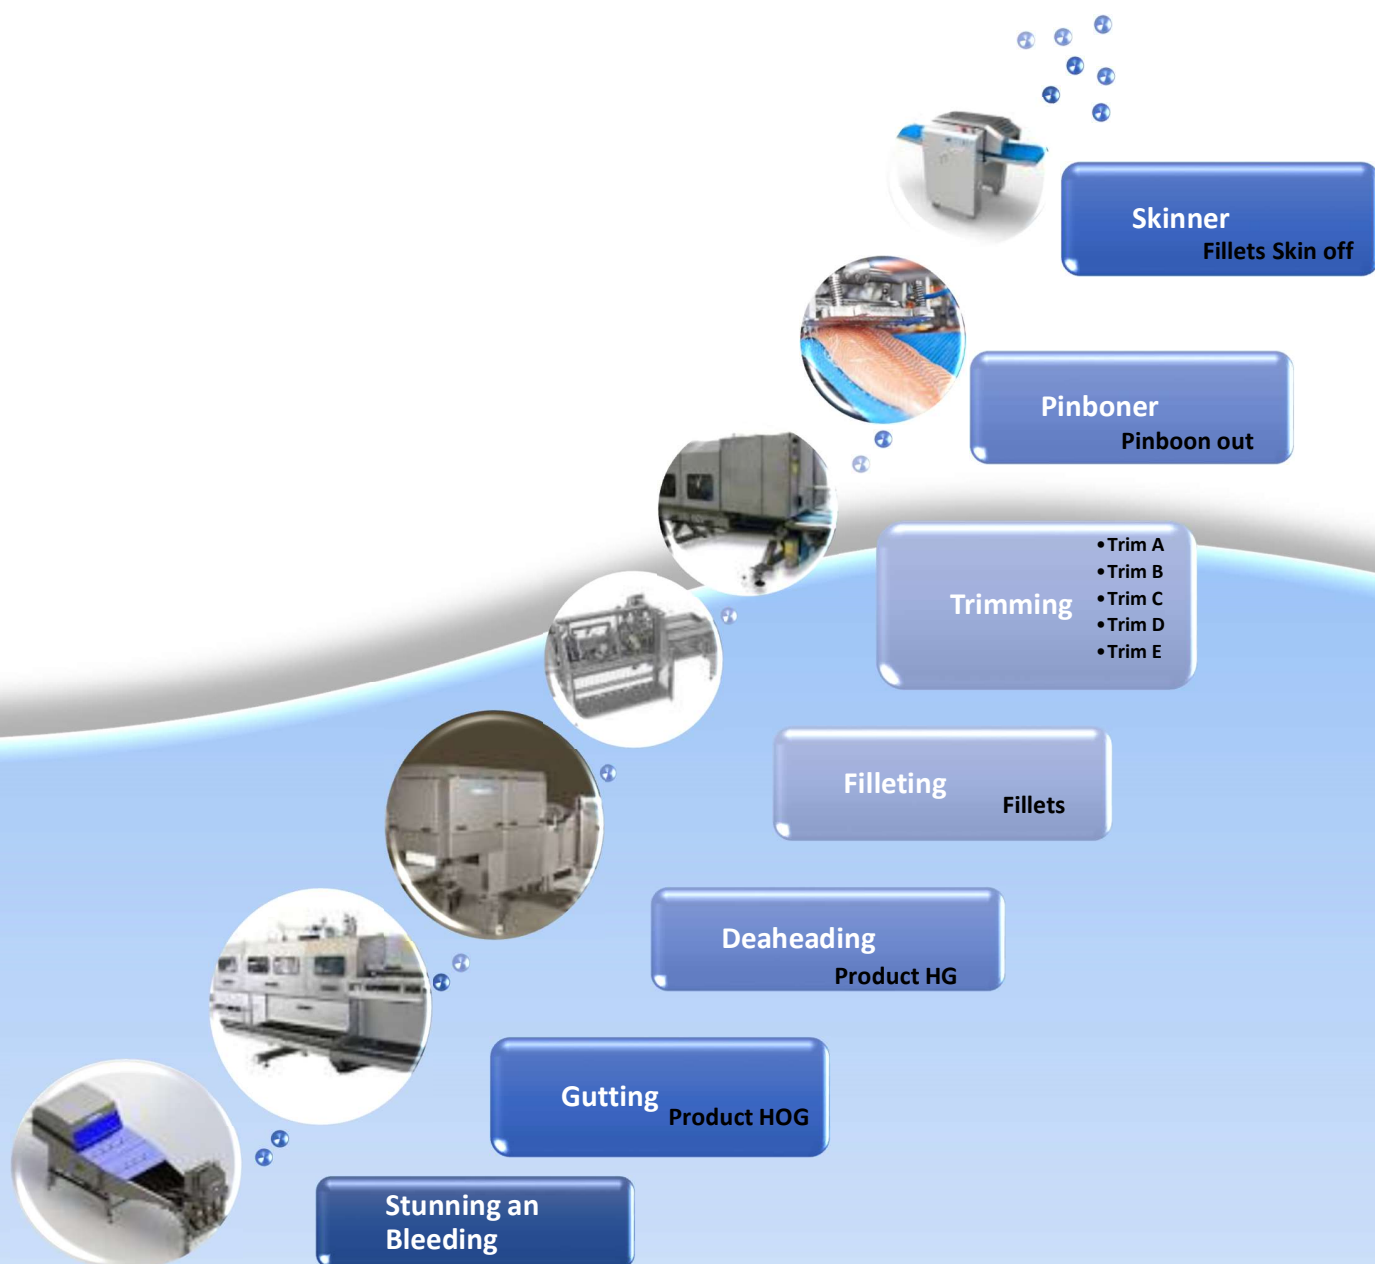

Production in conformity with International standards, high quality and innovative frozen sea foods with competitive prices, fair market prices for fresh and frozen delicious Black Sea Rainbow Trout, protecting the environment, sea and species.

Vision

We believe in a value system which is based on honesty, integrity and transparency which we religiously practice in our dealings with all costumers. We focus on satisfying our customers and never compromise on the quality of the products. We love challenges and push our limits in striving for perfection. We have a responsible team of employees who are motivated to take initiatives and deliver results.

Processing

Our Product

Black Sea Rainbow Trout

The rainbow trout is a delicious and versatile basic food for everyday meals and special occasions alike, containing great quantities of vitamin D, healthy omega-3 fatty acids and proteins. Rainbow trout is a popular fish species with beautifully patterned skin and fins as well as a red and violet lateral line and small dark spots on the skin and fins. Rainbow trout is a red-fleshed fish. Our trout is presented from the very clean lakes of our country Trabzon by providing the calibration consistency with the extensive calibration option. It is processed in compliance with the EU regulations.

Akerko produces according to international fish production standards. The quality and hygienic environment of our frozen products, the speed and reliability of our service separate us from the rest of producers. One of the features that distinguishes us from other fish-processing factories is that we select fish farms carefully and we follow the fish starting from the hatchery period. We determine the quality of the feed given to fish and do all analyzes monthly.
